Soothe

The Lemon Twigs

I wanna soothe your name and lose its fall Don't wanna lose you now that I want it all, all

And when the end rolls around we'll be away Enough to find you standing still While the rest of the world keeps spinning like a top Stick around, we can make it if you stop Stop, stop

I'd like to show you what I'm looking for I'd love to know you just how I need it

And when the end rolls around we'll be away Enough to find you standing still While the rest of the world keeps spinning like a top Stick around, we can make it if you stop Stop, stop

And when the end rolls around we'll be away Enough to find you standing still While the rest of the world keeps spinning like a top Stick around, we can make it if you stop Stop, stop
