

Deep End

The Lemonheads

Tell me, can you keep a secret?
Can I keep your cigarettes?
We can hold a meeting
But I wouldn't hold my breath
Maybe later on the weekend, we can
Watch the clouds come over

So you're showing all the symptoms
Coughing up a ghost
Going into treatment
Better double down the dose

Going off the deep end, depends
A question of composure
Watch the clouds come over
Canary in a coma

I really took a shine to her
We're going for a line
I really took a shine to her
I really took a shine

So you say you got a tooth ache
That, I can understand
On the way to doomsday
You better find yourself a friend
Maybe later on the weekend, we can
Watch the clouds come over

So you're showing all the symptoms
Coughing up a ghost
Going into treatment
Better double down the dose

Going off the deep end, depends
A question of composure
Watch the clouds come over
Canary in a coma

I really took a shine to her
Now we're going for a line
We're going for a line with her
I really took a shine to her

Tell me, can you keep a secret
While I keep your cigarettes?
We can hold a meeting
But I wouldn't hold my breath
Maybe later on the weekend, we can
Watch the clouds come over

So you're showing all the symptoms
Coughing up a ghost
Are you going into treatment?
Better double down the dose

Going off the deep end, depends

A question of composure
Watch the clouds come over
