

Our Future

The Levellers

How are you doing now
Are you feeling better off
I just want your thoughts

Look at what you spent
On all that food and rent
You'd better not get depressed

They're creeping through your life
A silent conquest
Are you ready for the lies

Cos they are what you see
There's no pity ideology

All that gets said
Is fruitless and dead
Ever since we entered
The madman's dreams

Well up now means down
The world turned upside down
Ever since we entered
The bad man's dreams
And it's much worse than it seems

The future our future
It's the only one we should talk of now

Well every thought you had
That you thought was bad
Now mean nothing
Since we entered
The bad man's dreams
And every plan we made
To get things into better shape
Now mean nothing
Since we entered
The mad man's dreams
And it's much worse than it seems

Hands up now
Time to shout
First we're in
And then we're out
Now that we have entered
The mad man's dreams
I've got all of this to say
But who's listening anyway
Now that we have entered
The bad man's dreams
And it's much worse than it seems
