Like You Do

The Lightning Seeds

You have to cut right through all the Pepsi lies And hold on tight, it's a stormy ride To get through to what you do Like you do, from wheels that never turn And lessons never learned Searching for a space where dreams will never burn Through the twists and turns, it's a funny world

Are you the king of cool with a secret sign Or the king of fools in a pack of lies Get through to what you do Like you do, from keys that never wind A place without a time Wishing on a star that's never gonna shine Through the twists and turns, it's a funny world

Get through to what you do

Like you do from wheels that never turn, lessons never learned Searching for a space where dreams will never burn Through the twists and turns, it's a funny world

Be everything you are, cherish what is true Celebrate with those who need to be with you Through the twists and turns, it's a funny world
