

Forro

The Little Ones

Let's make something out of nothing
For love and glory has a story
A faded burst that's so pronounced

Let's go out into the night
We want to get that feeling and do it right
There's no place around us that'll ever hold us down

Shine like headlights in full motion
The hue and chatter rises faster
Our candle is burning but it never goes out

That's what we do all day
We want that feeling; it's on it's way
There's no place around us that'll ever hold us down

Moving like we did before

Steering us, knocking on your door

There's no place around us that'll ever hold us down

Moving like we did before

Steering us, knocking on your door
