

Copernicus

The Long Winters

We caught an honest buzz
You caught us, called it dangerous
I doubt I made a sound
You thought it was erotica, it was erotic

You call a cough a smile
Now I can't tell glad from ill
You doubt my world is round
You right I was, Copernicus
You're right I was
Copernicus

You don't have to wait to come undone
Not about the night we hauled lee

Heaven rain on the lake tonight
Into the lake now, way to go
Someone made a mistake tonight

And they're blaming it all on you
Swimming told me you waited too long
Waiting for the light now, way to go
Hold the rope they're gonna hang you from
They're blaming it all on you

You don't have to wait to come undone
Not about the night we hauled lee

We caught an honest buzz
You caught us, called it dangerous
I doubt I made a sound
You thought it was erotica, it was
Copernicus
