

Bring Us Down

The Luka State

Slow down this is getting ugly
I know what you say about me
I break my back just to watch it all fade away
I see things a little different
You doubt I can go the distance
I break my back just to have it all
Blow up in my face

We want it so much
We keep our guard up
We're done with tough love
But we won't let you bring us down
We want it so much
We keep our guard up
We're done with tough love
But we won't let you bring us down

I'm tired of your ignorance
Drag me down with your bitterness
I'm told that you are a loner
And you're never gonna stop
You claim to know things about me
These traits that nobody else sees
Spin your lies and watch it all fall apart

We want it so much
We keep our guard up
We're done with tough love
But we won't let you bring us down
We want it so much
We keep our guard up
We're done with tough love
But we won't let you bring us down

You say we're no good for this town
What goes, always comes back around
You say we're no good for this town
You say we're no good for this town
What goes, always comes back around
You say we're no good for this town

We want it so much
We keep our guard up
We're done with tough love
But we won't let you bring us down
Down
Down
No we won't let you bring us down
