

Lies! Lies! Lies!

The Luka State

We're past the point we're already gone
Nothing will save us now
Our history speaks right for it's self
But education will prevail

When did we lose our kindness
And the love passes by us
Will we hold hands or lay down and die

Cause we're all only human
And we all want to change the world
Cause we're all only human
And we all want to change the world

The TV saps your sanity
All the lies that you are fed
The media controls humanity
To numb your brain down dead

When did we lose our kindness
And the love passes by us
Will we hold hands or lay down and die

Cause we're all only human
And we all want to change the world
Cause we're all only human
And we all want to change the world

Well Some Say
We're Going Nowhere
Going Nowhere
Going Nooo...

Well Some Say
We're Going Nowhere
Going Nowhere
Going Nooo...

Cause we're all only human
And we all want to change the world
Cause we're all only human
And we all want to change the world
