

Say Something

The Luka State

Falling in and out of love
I feel your heart beating
I guess that you're leaving

It comes as a surprise
I thought that we beat it
Life it can deceive me

Now we're running on empty
The memories flow right through me
I guess that we're sorry

Did you ever stop to wonder
Why you never said that
I'll be there when the world ends
I'll be there when the world ends

And you never said "I love you"
And you never said that
I'll be there when the world ends
I'll be there when the world ends

The bad patch will wash over
Am I being cynical
Maybe I'm delusional

Now we're running on empty
The memories flow right through me
I guess that we're sorry, sorry

Did you ever stop to wonder
Why you never said that
I'll be there when the world ends
I'll be there when the world ends

And you never said "I love you"
And you never said that
I'll be there when the world ends
I'll be there, I'll be there

Now we're running on empty
The memories flow right through me
I guess that we're sorry, sorry

Did we ever try?
Did we ever try hard enough?
Did we ever try hard enough?

So won't you say something, say something
And I want you to say something, say something
And I want you to say something, say something
So won't you say something, say something
