## **Restless River**

## **The Magic Numbers**

Careless seems the night It breathes the air though mists I wait inside Fearfull of hurting The realm that all the past we wash away

You came away before the warning signs There is no other way to leave this side behind

We don't move on the season What was there to worry you She cried his name Round and round the rosary Was left of you Will let me be I'm falling

Restless River flows It's strengh beneath the banks of stupid crawl Helpless as a child I held your hand in fear of letting go

You pulled away before the warning signs There is no other way to leave this side behind

I am rejoiced as I lay To kiss the sky, the sky is bright The stars parades through Round and round the rosary We might to push away Or is it me that's falling

I wonder where you are I wonder where you are Each night I see you dance across the water

I wonder where you are I wonder where you are Each night I scream awake in instant morning
