

Bipolar Love

The Marcus King Band

I left in a hurry, terrified of confrontation I may find
You stayed back to pick up all the pieces of love we left behind
I've been crazy long as I can remember, you went crazy when I met you
I thought we'd find our way back home
Yeah, but somehow, now I know that wasn't true

If we could grow together
Then I know forever could be mine
If we lose each other
Then another lover, you will find

Love is
Love is bipolar
It always gets colder
As soon as you warm up to me

Last thing I remember was you slamming the door right in my face
Said you need some time to think about all of the crazy shit
The crazy shit that I say
Where did we go wrong?
Tell me just how long I've been away
When my mind starts to wander
You're the first-responder, reminds me not to space

If we grow together
Then I know forever could be mine
If we lose each other
Then another lover may you find

Love is
Love is bipolar
It always gets colder
As soon as you warm up to me

Oh, my love is
Love is bipolar
And I should have told her
That I'm so damn hard to read

We grow together
Then I know forever could be mine
If we lose each other
Then another lover may you find

Oh, love is
Love is bipolar
It always gets colder
As soon as you warm up to me

Oh, love is
Said my love is bipolar
I should have told her
Mm-mm
That I'm so damn hard to read

I should have told her
That I'm so damn hard to read
