

Chances

The Material

These are chances we take,
This is the way that it feels
When you give anything for what you love
You won't stop until it's real, yeah!

I feel in alive, here on the phone drive
The cities and states
So bring on the late nights
I know this will be worth it all one day
Stop lights and crossroads,
Goodbye through windows and prison remain
So far from my home
This road's the only one I wanna take

And this road, the easy
But it's worth all the blood that I bleed
And you call it dreaming,
But it's everything to me

These are the chances we take
This is the way that it feels
When you give anything for what you love
You won't stop until it's real, yeah.

Hot nights of summer
One day will come this to tell of the lies
It won't last forever, so let's just make the most of it tonight
We can't to we've come so far now,
To say that we've tried
Chasing the sun down, with takes down of memories to life

And this road, the easy
But it's worth all the blood that I bleed
And you call it dreaming,
But it's everything to me

These are the chances we take
This is the way that it feels
When you give anything for what you love
You won't stop until it's real

No ...you fight now
And make my life without regrets
A promise, with my last breath

These are the chances we take
This is the way that it feels
When you give anything for what you love
You won't stop until it's real.
