

What we are

The Material

You don't know our names
So call us what you want
But we won't leave this place
Until we've left our mark

Like a cigarette
Try to stomp us out
The walls that you've built up
We're gonna burn them down

Take or leave it, we're not gonna change

CHORUS

This is what, this is what we are
Forget what you've been told
Little do they know
We're just getting started
This is what, this is what we are
Not fooling anyone
Take a look at what we've done
We're just getting started

I can feel their eyes
Trying to dim our light
The harder that they try
The brighter we will shine

We are the wayward sounds
You can't hold us down
Cause we have learned to fly
With our feet on the ground

Take or leave it, we're not gonna change

This is what, this is what we are
Forget what you've been told
Little do they know
We're just getting started
This is what, this is what we are
Not fooling anyone
Take a look at what we've done
We're just getting started

Times up we've been hidden for too long
Gotta scream, gotta scream it from our lungs
Times up we've been hidden for too long
This is what we are□ this is what we are

This is what, this is what we are
Forget what you've been told
Little do they know
We're just getting started
This is what, this is what we are
Not fooling anyone
Take a look at what we've done
We're just getting started
