

Rolling Along

The Mavericks

Life isn't easy it's uphill believe me
Whether you're weak or you're strong
Sometimes you feel like you're back on your heels
And everything's going all wrong

Through the confusion and all disillusion
Somehow life still goes on
I found a cure I know works for sure
And we just keep rolling along

So bring on the trouble and burst every bubble
I promise it won't change a thing
I always find that my peace of mind
Still flies like a bird on the wing
What's going to happen is still going to happen
The one thing that you can count on
Don't fix what ain't broken while Willie's still smoking
We'll just keep rolling along

When everything fails I relax and inhales
'til all my worries are gone
So there's my cure and it works for sure
And we'll just keep rolling along
