

Compressor

The Microphones

These microphones hear tons of sounds
And they can figure all of them out
Nine or ten plastic microphones

But there's one thing I never use called a compressor
When I first found it I couldn't figure it out
Now I understand
Here's what they do
I think that I know
They keep their eye on you

dreams come true
Tell Daddy how to change a diaper correctly
I'm looking forward to buying a microphone for you
