

Discover fire then invent the wheel
Make it feel like it was no big deal
Make a killing if you are willing to do what it takes and then
If you are willing, then have at it
Have a field day if you haven't had it
Have the wisdom and the where with all to call if you should break again

We're not here to misinform you
We are only trying to warn you

We are with you not against you
We only hope you got the common sense to realize, we're unified
Realize we are here to back you
And not let anybody else attack you
So you know we're on your side, we're unified
We're unified

Classic textbook and it's typical
Roll the boulder back on up the hill
It gets to feeling like the ceilings gonna drop just like a rock on you
As the ceiling starts to droppin'
That's when you feel like your heart is stoppin'
Your heart is stoppin' and your heads up on the choppin' block there too

It's not something you signed on for
What you were built for or designed for

We are with you not against you
We only hope you got the common sense to realize, we're unified
Realize we are here to back you
And not let anybody else attack you
So you know we're on your side, we're unified
We're unified

We are with you not against you
We only hope you got the common sense to realize, we're unified
Realize we are here to back you
And not let anybody else attack you
So you know we're on your side, we're unified
We're unified
We're unified
We're unified
