

Lullaby IV

The Moth & The Flame

Like tree roots intertwined
Or the San Andreas Fault
We grow together or we grow apart
(We grow together or we grow apart!)

Like the orbit of the planets
Or glaciers melting down
We bend together or we break apart
(We bend together or we break apart!)

Like the galaxy expanding
Or stars out of the sky
We grow together or we fall apart
(We grow together or we fall apart!)

We grow together or we fall apart

I don't want to fall apart again
A colossal star collapsing in
Don't let me fall apart again
When the black hole of my heart opens
We grow together or we grow apart
We grow together or we grow apart

I don't want to fall apart again
A colossal star collapsing in
Don't let me fall apart again
When the black hole of my heart opens
We grow together or we grow apart
We grow together or we grow apart
We grow together, we grow apart
We grow together, we grow apart
We grow together, we grow apart
