

## Ground Level

## The Mountain Goats

You can make out all the exits  
From a static position  
One quick walk around will give you  
All the relevant information  
I'm never gonna to break my neck  
Falling down stairs  
Tan and mustard-yellow I-beam  
Visible from the air

Tall space heater  
Down the main hallway  
Blue pilot light  
Hissing all night

We sleep light in the shadow of the cloverleaf  
We sleep light in the shadow of the cloverleaf  
We sleep light in the shadow of the cloverleaf  
We sleep light in the shadow of the cloverleaf

You can light a cigarette  
Against the cooktop if you need to  
Feel the heat against your forehead  
Let it bleed through  
You're never going to get by  
On three hours' sleep a night  
Unless you absolutely have to  
And then you get by all right

Move in silence  
If you can't stay still  
Nobody sees your face  
Through the security grille

We sleep light in the shadow of the cloverleaf  
We sleep light in the shadow of the cloverleaf  
We sleep light in the shadow of the cloverleaf  
We sleep light in the shadow of the cloverleaf
