

Standard Bitter Love Song #5

The Mountain Goats

Come down in the flatland
Show me your shoulder
Wait now where the black hand touches us
We'll both grow older

And the sky above us
And the ground beneath us
And the air around us
And the ocean to the right

Measure your arm length
I can't live without it
I treasure those thirty inches
I want to talk about it

And the sky above us
And the ground beneath us
And the air around us
And the ocean to the right

Love you in the cold air
Your long hair makes me shiver
Above you I see the sun
Light up every sliver

And the sky above us
And the ground beneath us
And the air around us
And the ocean to the right

And the sky above us
And the ground beneath us
And the air around us
And the ocean to the right
