

# Siren

The Movement

We're all in this together  
It's alright

Turn on your television  
Get sucked into a world of corporate greed and get fuck  
When idle hands empty  
Ego run amok  
So get up pass the buck  
We ain't got a ton of luck  
We ain't got a lot of time either  
Calling out my people gotta pick up the receiver  
We ask the government and no they won't help neither  
So we turn a naysayer to a positive believer  
Rise above

They try to break you down  
Don't let them get ya  
Rise against the system  
See the bigger picture  
Sound the siren  
Know that I am with ya  
We're all in this together  
It's alright

Turn on your record player and run  
Into a world of beautiful collaboration  
Meditate on the melody, lyric, and the one drop  
Don't stop until the revelations come  
And now it's time to get clever  
They try to yell quit but we reply never  
They opened up the trap door  
Pulled down the lever  
But we made a quick escape and now we make it last forever

Switch up the melody, sound up the siren  
They say eventually we're burnin' ash in the fire  
They break us down but the music make us high  
There's a lesson in the message, when revealed it gets quiet.  
Yeah there's something in the air tonight,  
Catch a vibe when the feelings right  
Kill the silence, ring the alarm  
Sound the siren
