

So Cool

The Movement

I swear I can feel you spin
But maybe we've spun too far
Can you tell me where I fit in
'Cause I see you for who you are
We were both born under the same small star

We come from the same dark place
A ways away
Out in outer space
But it's hard to say
Underneath it we're all the same
The same thing
We've both just been part of the one
Always

So cool
So new
Every single part of you
So true
So cool
So new
Every single part of you
So true

If I listen I can hear you cry
Still I treat you the way I do
And I couldn't even tell you why
When I've always come home to you
To the ocean I love and the sky so blue

We come from the same dark place
A ways away
Out in outer space
But it's hard to say
Underneath it we're all the same
The same thing
We've both just been part of the one
Always

So cool
So new
Every single part of you
So true
So cool
So new
Every single part of you
So true

If I close my eyes I see your face
Every shadow, every light the same place
From the abyss through space and time
Against all odds our paths align
And in the dark there was a spark
Who would've thought eventually
It would connect our hearts

We come from the same dark place

Play-ay-ay-ace
Thirteen billion years 'til now
We came to inhabit this place
And it all seems so unlikely
A chance we should not waste
Let's make the most out of this time

So cool
So new
Every single part of you
So true
So cool
So new
Every single part of you
So true
