

Visions

The Movement

If I could only see your future
Wouldn't need more
I would know that you were alright
And I could just be at peace
Knowing that you got this
Wouldn't have to lay awake all night
Sometimes it's so hard to love somebody so much
You wanna guide them through
Still the universe has its own way of seeing time
And I get blinded by the sight of you

Let us have visions
Of a lifetime
We gotta listen to understand
And we make decisions
On a timeline
We gotta give them to the land

I just can't forget about how we used to sit around
Laughing till the sun came up
You and I were meant to be together
You were sent to me
Whether you believe it or not
Used to see us dreaming
So peaceful upon some island
And living like everyday was our last
Now I'll be OK just as long as I got you by my side
Hoping the day won't go by so fast

Let us have visions
Of a lifetime
We gotta listen to understand
And we make decisions
On a timeline
We gotta give them to the land

We are the makers of our destiny
Still life is one big mystery
Our questions have no answers to explain
Time goes on forever endlessly
For what feels like eternity
And all we have is what still remains
You know I wanna try to find
A better way to live my life
My vision stays clear and is true
We're going back to the way it was
And I could never change it 'cause
We're guided by the visions of you

Let us have visions
Of a lifetime
We gotta listen to understand
And we make decisions
On a timeline
We gotta give them to the land
