

## I Can Feel It

### The National Parks

There's something in the air, I sense it  
Like the wind changed directions  
I can hear the storm, it's rumbling  
Sounds like a freight train coming

Oh, it's a current, electric, a fire, magnetic  
The city streets at night  
An eruption, explosion, an earthquake, commotion  
A gamma-ray burst of light (I can feel it)

Oh, it's like the stars aligned (I can feel it)  
Tonight's the night I come alive (I can feel it)

It's all coming into my view  
My eyes see for miles, I'm on the move  
Look now, the water's raging  
Feels like the tides are changing

Oh it's a current, electric, a fire, magnetic  
The city streets at night  
An eruption, explosion, an earthquake, commotion  
A gamma-ray burst of light (I can feel it)

Oh, it's like the stars aligned (I can feel it)  
Tonight's the night I come alive (I can feel it)

Can you feel it?  
There's something in the air, I sense it  
I can feel it

Can you feel it?  
Oh, it's like the stars aligned (I can feel it)  
Tonight's the night I come alive (I can feel it)  
A current, electric, a fire, magnetic  
Oh, it's like the stars aligned (I can feel it)  
An eruption, explosion, an earthquake, commotion  
Tonight's the night I come alive (I can feel it)  
I can feel it
