Trouble

The National Parks

We were shadows in the moonlight
I didn't even know your name
Dancing like trees in the night breeze
Listen as the music played
I was running with my eyes closed just howlin at the wind
And lost all the air from lungs when you walked in

How long until you run away with my heart
How long until you run away with my heart
I knew you were trouble from the start

You came to me like a vision
The way you looked like a dream
And the smoke-filled room, it felt like heaven to me
You rattled my bones, you got under my skin
And took all the air from my lungs when you walked in

How long until you run away with my heart
How long until you run away with my heart
I knew you were trouble from the start

There's no oceans in the desert but it didn't feel that way
Like an earthquake shapes the rivers, everything inside of me c
hanged
When you walked into the room in knew that I would never be the
 same

How long until you run away with my heart
I knew you were trouble from the start

How long until you run away with my heart
How long until you run away with my heart

How long until you run away with my heart
I knew you were trouble from the start
