

# Sister Mercurial

The Night Flight Orchestra

Sitting outside the temple walls  
Right after 2 AM  
Hoping for the clouds to part  
And let the darkness in  
High after the ritual  
Our bodies craving more  
It was all instinctual  
En route to evermore

Sister mercurial, you're in me  
Ever unchanging in those starry nights of youth  
Sister mercurial, believe me  
There will never be another quite like you

I remained terrestrial  
You took to the air  
I despised the factual  
You became aware  
And I never will regret  
Choosing death when we were young  
Somewhere in the stratosphere  
You will watch me till I'm done  
Done

Sister mercurial, you're in me  
Ever unchanging in those starry nights of youth  
Sister mercurial, believe me  
There will never be another quite like you

Sister mercurial, you're in me  
Ever unchanging in those starry nights of youth  
Sister mercurial, believe me  
There will never be another quite like you
