

## Terrified

### The Old Dead Tree

Somehow we lost the very light  
that lit our future  
We let our guard down for a night  
To relieve the pressure

So we tried to go back in time  
Before the wound was open  
It was too late to make things right  
The bond was broken

Sometimes I wish that we never tried  
I'm terrified

Together we can prevail  
We cannot afford to fail  
We all know that hope is frail  
(As) nothing really lasts forever

Somehow we lost the very fight  
That shouldn't be lost  
We were supposed to be alright  
No matter what the cost

We promised not to take the path  
That led to our own end  
We were like kids, the sun was bright  
Together we would stand

However I did my best  
I gave it all, no one can contest  
I swear I didn't pray  
For this to happen that way  
I'm terrified
