

Take Love If You Ever Find Love

The Osmonds

Life without loving is no life at all
When there's no one to help you up whenever you fall
The day's never ending with nothing to share
And the house is so empty, you're the only one there

So take love if ever you find love
It comes along for everyone someday
So take love if ever you find love
And I found love, girl, when I found you

Chances are many in all that you do
So beware of a false love if you want one that's true
And maybe tomorrow will bring love your way
And do what you can, make sure
Love's there to stay

So take love if ever you find love
It comes along for everyone someday
So take love if ever you find love
And I found love, girl, when I found you

So take love if ever you find love
It comes along for everyone someday

So take love if ever you find love
And I found love, girl, when I found you
