

Math, The Stars

The Pack A.D.

Star of India
Space police
This is an ugly place to live
Every lane
Merges opposite
But all end up in the same place

Math, the great equalizer
Exclude us, perfect without us
And all those great things
You're gonna do
They're done

Now they're just gonna happen
They're just gonna happen to you

Star of India
Wheel release
This is an ugly place to live
Stuck in the
Spokes again
Got stuck in the spokes again

Math, the great equalizer
Screwing you to the sevens
And all those great things
You're gonna do
They're done
Now they're just gonna happen
They're just gonna happen to you

Math, the stars
It's who we are
(It's who we are)
Math, the stars
It's who we are
(It's who we are)
Math, the stars
It's who we are
(It's who we are)
Math, the stars
It's who we are
(It's who we are)
