

Crossfire

The Paper Kites

I was caught in a crossfire
I was still as the night
You were an angel in the shadows
When I saw the light

Found your eyes in the darkness
Found your face in the haze
There was a band they were playing
Couldn't say what they played

Through a crowd full of strangers
I could have shouted out
Though I couldn't speak
Until now

Could I be the one for you
Could I be the one for you
Could I be one for you
If you're the one for me
Could I be one for you
Could I be one for you
Could I be one for you
If you're the one for me

You came without warning
Like a thief in the night
And I never heard nothing
And I never thought twice

Cause I'd fall for you baby
And I'd fall every time
Fall right in to your arms
And back out to the night

Through a crowd full of strangers
I could have shouted out
Though I had no words
To speak until now

Could I be the one for you
Could I be the one for you
Could I be one for you
If you're the one for me
Could I be the one for you
Could I be the one for you
Could I be one for you
If you're the one for me
