

# Never Stand Alone

The Parlotones

Tried being a better man  
I'm not that strong  
I have another plan  
I will get strong  
I may be weak but I will get strong

Lightning light me up illuminate like fireflies  
Medusa magic cast my dreams in stone

I hope you understand  
That we belong  
Yes we belong  
Side by side

Lightning light me up illuminate like fireflies  
Medusa magic cast my dreams in stone

Where we stand, we never stand alone

We, we will never, never ever stand alone  
We, we will never, never ever stand alone, alone

Look up over there  
Midnight chandelier  
Flickers its wishes redirects our fears

Lightning light me up illuminate like fireflies  
Medusa magic cast my dreams in stone

Future tastes so sweet just like hurricane's delight

Where we stand, we never stand alone  
Where we stand, we never stand alone

We, we will never, never ever stand alone  
We, we will never, never ever stand alone

We will never, stand alone  
We will never, stand alone

We will never, stand alone  
We will never, stand alone
