

That sorrowful rhythm won't stop echoing in my heart Since that day I became just a robot that cannot die Good-bye, baby, I cannot live up to your hopes I don't believe I can ever be changed

Calmly, coldly I look down upon everyone Since that day I became only a wise robot Good-bye, baby, I'm almost all lies now I used to believe I could be honest

I've thrown away my emotions I only want to sleep quietly But it's so strange to be alone The flowing tears wet my cheek So cold, so like a robot I am

I am harsh to everyone but myself Since that day I became a lifeless robot Good-bye, baby, it's a hedgehog's dilemma I don't believe I can ever be healed

Tomorrow you'll be gone Who will I rest with now? Oh yeah, it's a mystery The flowing tears wet my cheek So cold, so like a robot I am

In an instant no one will be left I will sleep alone, then Oh yeah, it's strange The flowing tears wet my cheek So cold, so like a robot I am

Good-bye, baby...
