The Pink Spiders

Mister Oblivious, I'm sorry when I say  
The company you keep is keeping you in disarray  
Being alone is scary, but she's just so ordinary  
Every little move sucks the air out of the room  
So I hate to say it but your lady is a snake  
And through my veins I feel the weight of all her venom  
I think she'd make a lovely pair of boots

When she gets gone  
You'll have every little thing you want  
You can do everything you want to do  
You won't ever have to hear her talk  
And you'll never miss this feeling  
Never miss this feeling

Listen to me, grab your jacket and leave  
Get in the car and turn the radio on  
Listen to me, grab your jacket and leave  
Get in the car and turn the radio on  
Cause you'll never miss this feeling  
Never miss this feeling

Tonight we're gonna light up this whole town  
So turn your bottle goddamn upside-down  
We're spreadin' like confetti in the streets  
And everybody knows which way to be  
I know it feels like she's get her claws into you  
But it'll get better when you let her slip away
