

World Collapsing

The Presets

At night my thoughts they turn to worlds familiar
I wonder if you feel the same way too
The taps and tones and rings connecting through to you
A silhouette appeared in sunlit room

The sun it warms our bodies like a fire
We followed every star and found truth
But oh, tonight we saw a world awaken
And followed every thread to get to you

Dance with me tonight we'll feel the world collapsing
Under our feet, under us
Take my hand tonight we'll watch our world collapsing

Dance with me tonight we'll feel the world collapsing
This world at our feet's not made for lovers
Take my hand tonight we'll watch our world collapsing

You and I will find a way to start again
You and I will find a way to start again

At night my thoughts they turn to worlds familiar
I wonder if you feel the same way too
The taps and tones and rings connecting through to you
A silhouette appeared in sunlit room

Dance with me tonight we'll feel the world collapsing
Under our feet, under us
Take my hand tonight we'll watch our world collapsing

Dance with me tonight we'll feel the world collapsing
This world at our feet was made for lovers
Take my hand tonight we'll watch our world collapsing

You and I will find a way to start again
You and I will find a way to start again
You and I will find a way to start again
You and I will find a way to start again
