

Loose Balloon

The Presidents Of The United States Of America

Loose balloon, how high can you fly?
You're a loose balloon, before you pop and you die
Loose balloon, you made that little kid cry
When you took off for the sun

Loose balloon, how high can you fly?
You're a loose balloon, before you pop and you die
Loose balloon, you made that little kid cry
When you took off for the sun

And just this morning you were flat and deflated
None knew if you were loved or hated
Just another shriveled up loser in a bag
So to the kid that tried to get ya
Held like kitten, he was happy to pet ya
Till' he caught a sucker and opened up his hand
Free so free now the skies the limit
20 miles up and its just the beginning
Spaceman, planets and lunar surface here i come (here i come)

Loose balloon, how high can you fly?
You're a loose balloon, before you pop and you die
Loose balloon, you made that little kid cry
When you took off for the sun
When you took off for the sun
People squint to look up
People squint to look up
Just to see you fly away
Just to see you fly away
Just to see you fly away
Just to see you fly away
Now, you're absolutely free, so don't stop
You're absolutely free, so don't stop
You're absolutely free, so don't stop until you pop
