

This'll Never Be Like Love

The Psychedelic Furs

When love is at your feet with promises to keep
It's easy to pretend this road will never end

This'll never be like love
This'll never be like love
This'll never be like love
This'll never be like love

You argue and complain and give yourself away
The deathless air you breathe your social circle scene

This'll never be like love
This'll never be like love
This'll never be like love
This'll never be like love

A cold and drowning sea of secrets that you keep
The hand that moves the time the tears well never mind

This'll never be like love
This'll never be like love
This'll never be like love
This'll never be like love

Your faith has fallen down confetti on the ground
The pictures that you keep the lies you tell to please

This'll never be like love
This'll never be like love
