

# I Don't Come from Nowhere

The Quakes

I dont come from nowhere  
there aint no place call my home  
even in a crowd  
where I still feel all alone

I dont come from nowhere  
there aint no place call my home  
even in a crowd  
where I still feel all alone

Comes by the inside into all the human ways  
looking at society is like looking at its rage  
theres no time for reality  
when everything is fake  
trying to prove me wrong with every single move I make

As I look out to the night time sky  
signals send but still theres no reply  
and right now Im still on my own

I dont come from nowhere  
there aint no place call my home  
even in a crowd  
where I still feel all alone

Everything I see somehow Ive seen it all before  
trying to renatain myself wen everythings apart  
coming for them from the center of my brain  
passed a million years now and still they cant explain

As I look out to the night time sky  
signals send but still theres no reply  
and right now Im still on my own

Go!

I dont come from nowhere  
I dont come from nowhere  
I dont come from nowhere  
I dont come from nowhere
