

Call Me When You Get There

The Rare Occasions

Call me when you get there
Call me when you get there

You know traffic is a nightmare
Still I'm gonna drive there
Pick you up and get you home
It's been weeks since we were racing
From check-in to your gate
And all the while I've been alone

So won't you call me when you get there?
Call me when you get there

Do you know what time you're landing
Where you will be standing
Out beside the terminal?
I've been losing my my mind
My sense of space and time
This feeling's so impossible

So won't you call me when you get there?
Call me when you get there
Said won't you call me when you get there?
Call me when you get there

I'm here. Where are you? Call my phone

Call me when you get there
Call me when you get there
Said won't you call me when you get there?
Call me when you get there
Won't you call me when you get there?
Call me when you get there
Call me when you get there
Call me when you get there
