

Parasite

The Raven Age

The breeding mutation we're fated to own
There is no salvation in dying alone
Fading to ashes for letting us in
They're waiting to find out when will this begin

I won't let you in this time
I won't let you in my mind
You're a parasite
Parasite, let it be, open up your eyes

The new generation, the fountain of youth
They hide in the shadows concealing the truth
Forsaking the elders in stories of old
They learn of the future, punishment is told

I won't let you in this time
I won't let you in my mind
You're a parasite

Take me with you, pull me under
Tell me the truth, rain or thunder, cast aside

There's a place in my head where I can live in peace
But first I must distance myself from disease
This world is now falling apart at the seams
And fortune will favour me

Take me with you, pull me under
Tell me the truth, rain or thunder
Take me with you, pull me under
Tell me the truth, rain or thunder, cast aside
