

If I could read your mind I would make a start
And find a better way to speak to your heart
If I could read your eyes, I could see it through
You look, look away, look at what its come to, girl
Cause how could you be down, how could I be sweet
If I am just the one that you don't believe?
Forgetting the right, remember the wrong
It eats you up inside, how can we go on?

My baby don't be that way
You worry 'bout it too much
Have we run out of things to say?
Have we said too much?
Whatever you want from me
Don't worry 'bout anything

Late one night as I lie asleep
With my eyes shut tight, I'm gonna have a dream, here it goes
You wake up in the morning and you look outside
into the big, big yard, why would you stay inside? Cause you k
now
That in our big, big house on a quiet street
We be makin' love like you don't believe
Tonight's one night and a dreams a dream
But makin' all rights not hard, hard, hard as it seems
If you work with me

So baby don't be that way
Don't worry 'bout it too much
Because we'll run out of things to say
If we say too much
You know whatever you want from me
Don't worry 'bout anything

And if your girlfriends say that our love is wrong
To pack a big, big bag til your love is gone, and to go
Don't listen to them, don't listen to me
Listen to your heart, listen to that beat

Don't you worry 'bout what think
They don't mean a thing to us
Let them say what they need to say
It don't mean too much
Because whatever we want to be
Don't worry 'bout anything
