

Let's forget about the reasons why we cannot sleep
And focus on the fun over realities
We can open up the window and sing with the bees
Yeah, we'll open up the window and scream with the trees

I can't believe you're sitting next to me
Just open up your eyes and tell me, what do you see?
Do you see somebody looking back at you?
Or do you see somebody that's in love with you?
Let's break the clock and learn how to dance
I can't feel my feet or my knees or my hands
Yeah, it must be something in your good night

I can be your baby
If you wanna be mine
I'll color in the picture
If you just draw the lines

I wanna walk along the beach, as cheesy as it sounds
But there's something kinda special about walking around
'Cause it forces you to come undone
Yeah, true colors coming out in California sun

And I wanna know what you're thinking about
When you're looking at me and your dimples coming out
Do you see someone looking back at you?
Or do you see someone that's in love with you?
Let's break the clock and learn how to dance
Can't feel my feet or my knees or my hands
Yeah, it must be something in your good night

I can be your baby
If you wanna be mine
I'll color in the picture
If you just draw the lines

Anything can happen
Anything can happen
So just let it happen
Anything can happen
Anything can happen
So just let it happen
Anything can happen
Anything can happen
So just let it happen
Anything can happen
Anything can happen
So just let it happen

I can be your baby
If you wanna be mine
I'll color in the picture
If you just draw the lines
Oh, I can be your baaby
If you wanna be mine
And I'll color in the picture
If you just draw the lines
