

Let Loose The Horses

The Rescues

Let loose the horses
Let them run
Leave all the silver
We won't need it when the wind comes

If everything we know
All goes up in smoke

Nothing can take me away from you
(let it burn down, let it burn down)
Even if it rips right through
(in your arms now, in your arms now)
All that we've been living for
Doesn't matter anymore
My love let's watch it all burn

Grandfather ran guns
Blood spilled in the war
Love is why we're living
Can't remember what's worth dying for

If everything we know
All goes up in smoke

Nothing can take me away from you
(let it burn down, let it burn down)
Even if it rips right through
(in your arms now, in your arms now)
All that we've been living for
Doesn't matter anymore
My love let's watch it all burn

We built these fences with our hands
And time will tear them down again
Start over

Nothing can take me away from you
(let it burn down, let it burn down)
Even if it rips right through
(in your arms now, in your arms now)
All that we've been living for
Doesn't matter anymore
My love let's watch it all burn
