

## When It's Cold

The Rosebuds

When we get home, the porch lights on  
We step inside, next to the iron stove  
And Christmas time is about to start  
The tree's lit up with all the broken hearts

So all night long we dig to find  
Up in the attic where all the boxes hide  
The lights and cheer, for another year  
And the kids are jumping from the arms of the chairs

But it's cold, outside, and sitting here next to the lights

So let's go out into the ice and snow and wait on the roof until away we go  
Put on our scarves, breath in the cold and just hold on tight until away we go

When the family comes, we smile and smile some more  
The white sand turns into a dirty floor,  
It's Christmas time, kids wrestle outside  
And the older cousins all smoke and hide

Uncles eat, and watch the TV set  
And the waiting dogs are there to steal what's left  
It's half a song, then they're moving on  
And the sweet tea's got em all singing along

But it's cold, outside, sitting here next to the lights

So let's go out into the ice and snow and wait on the roof until away we go  
Put on our scarves, breath in the cold and just hold on tight until away we go
