

# Somebody Else's Life

The Saturdays

Feelin' like a millionaire  
Could be going out  
Could be going anywhere

We don't need those lights to see  
Cameras flashing in there right where we wanna be  
Don't want it all to stop  
We're here and that's enough

Cause you know that there's magic in this city  
Feels like living somebody else's life  
These streets are talking to me  
Feels like living somebody else's life

Don't know the way to go and it doesn't matter  
We could find what we need tonight  
There's magic in this city  
Feels like living somebody else's life

Nothing here can bring me down  
Cause the music is the heartbeat in this town  
Don't worry when the morning comes  
If you believe that we'd go on and on

Don't want it all to stop  
We're here and that's enough

Cause you know that there's magic in this city  
Feels like living somebody else's life  
These streets are talking to me  
Feels like living somebody else's life

Don't know the way to go and it doesn't matter  
We could find what we need tonight  
There's magic in this city  
Feels like living somebody else's life

Turn the music up I don't see a red light  
I can't get enough of the noise of the skylight  
Find somebody else under these stars tonight  
Open your eyes, open your eyes

There's magic in this city  
Feels like living somebody else's life  
These streets are talking to me  
Feels like living somebody else's life

Don't know the way to go and it doesn't matter  
We could find what we need tonight  
There's magic in this city  
Feels like living somebody else's life
