

The Problem With Love

The Saturdays

The problem with love is
With love is, with love is
The problem with love is
With love is, with love is

Calculating on this equation ever since you left me me me me me me me me
Tell me how could you leave me hanging without any netting netting

To catch my fall

It's so good when you're in it, like your first night in your new house that
ain't rented

Or a hot day in an S class with the windows tinted uh oh

And there's no rebound that could solve this now

Just read the warning sticker it says that

The problem with love is
With love is, with love is
So hard to live without it, without it
The problem with love is
With love is, with love is
So hard to live without it
Like when it's gone gone gone gone gone gone gone gone
Gone away, gone away
Like when it's gone gone gone gone gone gone gone gone
Gone away, gone away

Thought it was over but it's only the beginning of heartbreak
Break break break break break break, break me
Break me out of these chains shackling me to the thought of you
Thought of you

Like you're Blackberry's shut off and you're trying to live without it
Only times ten
Lost your best friend
Put that together and
And there's no price tag that could buy this back
Nobody told me that before I fell

The problem with love is
With love is, with love is
So hard to live without it, without it
The problem with love is
With love is, with love is
So hard to live without it
Like when it's gone gone gone gone gone gone gone gone
Gone away, gone away
Like when it's gone gone gone gone gone gone gone gone
Gone away, gone away
