

# Lost You

The Score

Fear is just a word 'til you feel it in your bones  
Try to sleep, I feel my body shake  
The shiver down my spine, yeah it gets me every time  
When I think I just saw your face

If you wanted love to stay  
Could have been the one to take you there  
And all the choices that we made  
Never knew they were mistakes until the end

'Cause I, I lost you, lost you  
I, I lost you, woah  
'Cause I, I lost you, lost you  
I, I lost you, woah

That fire we called life couldn't make it out alive  
See the flames reflecting in your eyes  
The smoke began to clear with the rest of all my fears  
Take a breath, but I'm alone this time

If you wanted love to stay  
Could have been the one to take you there, take you there  
And all the choices that we made  
Never knew they were mistakes until the end, until the end

'Cause I, I lost you, lost you  
I, I lost you, woah  
'Cause I, I lost you, lost you  
I, I lost you, woah

'Cause I, I lost you, lost you  
I, I lost you, woah  
'Cause I, I lost you, lost you  
I, I lost you, woah

'Cause I, I lost you, lost you  
I, I lost you
