

Superhuman

The Score

Think my DNA just might be broken
Feeling so small like a drop in the ocean
Searching for a sign tell me I'm not hopeless
'Cause I see it now and I can't lose focus

I don't need a miracle
To reach the pinnacle
I'm already on my way
Spirit so unbreakable
I'm unshakable
Dreaming but I'm wide awake

We are we are on higher ground
We are we are the future now
We are we are the revolution
We're superhuman

We are the light we are the change
We bring the fire ignite the flames
We are we are the evolution
We're superhuman

We're superhuman
We're superhuman

Something in the sky tells me it's not over
The stars on the horizon getting closer
Can you see the light suffocate the dark out?
Changing who we were to who we are now

We are we are on higher ground
We are we are the future now
We are we are the revolution
We're superhuman

We are the light we are the change
We bring the fire ignite the flames
Oh
We are we are the evolution
We're superhuman

We're superhuman

We're superhuman
