

I Want It All

The Script

All I could do
I've done
Down every road
I've run
Just tryna find someone
But I did it all for nothin'

Looked for the fire
Got burnt
Held out so much hope
It hurt
They're not mistakes
I've learnt
When it comes to love I'm searching for not just

Someone I can live with
I want someone I can't live without
Not just someone I can be with
I need someone I can't be without
I will stop at nothing
Until I find the one
I want it all
And then some
I want it all
And then some

I was a fool, you know
Cos who'd ever let you go
But when the story's told
Don't want it all just to be for nothing

I made you feel worthless you shoulda felt priceless
I was in the wrong ye, but now I'm gonna right this
No, I didn't see it from the start
But now I know exactly who you are

You're not just
Someone I can live with
You're someone I can't live without
You're not just someone I can be with
No, you're someone I can't be without
I will stop at nothing
Cos I know you're the one
I want it all
And then some
I want it all
And then some

I made you feel worthless you shoulda felt priceless
I was in the wrong ye, but now I'm gonna right this
No, I didn't see it from the start
But now I know exactly who you are

You're not just...
Just another love, this story happens once
You're not just...
Just another love, this story happens once

You're not just someone I can live with
You're someone I can't live without
I want it all
And then some
(And then some)

You're not just someone I can live with
You're someone I can't live without
Not just someone I can be with
You're someone I can't be without
I will stop at nothing
Cos I know you're the one
I want it all
And then some
I want it all
And then some
