

I Can Never Be Without You Anymore

The Secret Sisters

I remember when I felt the change
The way the wind had shifted, the moment that you came
But there you were
And there I was
Nothing but surrender
I let love do what it does

I didn't know that I needed you
I didn't know there was an empty space
That you fit into
I can't go back to who I was before
And I can never be without you anymore

I will never be the same
Since you wrapped yourself around me like smoke around a flame
But you are fortune
And you are fate
And love like this is heavy, but I'm carrying the weight

I didn't know that I needed you
I didn't know there was an empty space
That you fit into
I can't go back to who I was before
And I can never be without you anymore
No, I can never be without you anymore

I didn't know that I needed you
I didn't know there was an empty space
That you fit into
I can't go back to who I was before
And I can never be without you anymore
No, I can never be without you anymore
