

Dreams

The Sherlocks

Let's set our destination
My head's banging off the walls
If you wait until the morning
I'll be the answer to your calls
We had our expectations
And everyone fell short
Oh these dreams, they're never what they seem

We'll dance through space and time
Catch the silver line
When the world is on my side
When the world is on my side

I want something you don't know how to find
So I'll return when the world is on my side

You've got fear of deprivation
And we live it side by side
When your face don't fit it's one thing
But you've never thought to question why
You had hopes and aspirations
We're all dreamers by design
But all these dreams they're never what they seem to be

We'll take a step in time
We'll make it out alive
When the world is on my side
When the world is on my side

I want something you don't know how to find
So I'll return when the world is on my side

When the world is on my side
When the world is on my side
When the world is on my side
When the world is on my side

We'll dance through space and time
Catch the silver line
We'll take a step in time
We'll make it out alive
