

## Better Place

The Shires

Broken and hopeless barely getting by  
That's who I told myself I was that night  
Then an angel in blue jeans pulled up a seat next to mine  
Ordered my drink tequila no lime

How'd we get from "how are you?"  
To kissing in a corner booth  
To my love and my best friend  
To being who you say I am

Let me stay with you  
Stay with you all of my days  
And I'll be leaving this world  
In a better place  
I just wanna lay with you  
Lay with you that's all it takes  
And I'll be leaving this world  
In a better place, a better place

Got so used to lonely had to drag myself out  
Told all my friends I'll only last an hour  
I saw a halo above you in the neon light  
That empty chair beside you had to be a sign

How'd we get from "how are you?"  
To kissing in a corner booth  
To I never want this night to end  
To putting this ring on my hand

Let me stay with you  
Stay with you all of my days  
And I'll be leaving this world  
In a better place  
I just wanna lay with you  
Lay with you that's all it takes  
And I'll be leaving this world  
In a better place, a better place

Let me stay with you  
Stay with you all of my days  
And I'll be leaving this world  
In a better place, a better place
